It is a pleasure for me to write this letter of recommendation for Mr. Ioannis Klonaris—an applicant for employment at Dr. Sulaiman Al-Habib Medical Group. Mr Klonaris worked in my cardiology department from January 2011 to February 2012. He was specially recommended to me from my fellow colleague and head of the cardiology department at the General Hospital of Athens, the largest and busiest in Greece, Dr. Pyrgakis.

He gained my trust right at the first moment. Ioannis is a well trained and self-confident young cardiologist whose abilities and skills exceed the current status of our cardiology expertise.

Ioannis was immediately assigned as head of the Heart Failure and Arrhythmias office which has an annual capacity of at least 600 patients. There he confined a wide range of diseases from Atrial Fibrillation management to end-stage Heart Failure and Ventricular Tachycardia. His dedication and commitment to his patients and to his clinical practice in general is admirable and sets a good example for fellow colleagues.

As our most youngest consultant in Cardiology, therefore more motivated, he was responsible of the CCU (5 beds) and of the management of highly-risked patients. Temporary transvenous pacemaker implantation, thrombolysis and in general critical cardiac care was a common practice and Mr. Klonaris was more than capable in corresponding at these situations.

Indeed his exceedingly high communication skills and intellectual abilities were the main reason he was responsible for the education of the rest of the cardiology fellows as well as the doctors in training.

In summary, Ioannis demonstrated diligence, academic competence and commitment to patients in clinical settings. He is professional, takes initiative, works hard and is resourceful making him well-liked. Thus, on the basis of his well demonstrated capabilities and accomplishments I highly recommend Mr. Klonaris as a cardiology consultant at your institution.

Chalkis, 7/10/2013
